

## I. INTRODUCTION

---

This report has been prepared in the form of an addendum to the Draft EIR (DEIR). This document, together with the Draft EIR, which is incorporated by reference, may be considered a Final EIR upon its certification by the Town of Colma City Council as complete and adequate under the California Environmental Quality Act, and its State and local guidelines. This volume of the Final EIR contains copies of all letters received during public and agency review of the Draft EIR and written responses to those comments; and revisions to the Draft EIR.

Components of the Response to Comments are as follows:

- Incorporation by reference of the DEIR;
- Comments received on the DEIR within the noticed public review period;
- The responses to written comments made on the DEIR during the review process;
- The responses to comments made at the Public Hearing;
- Revisions/corrections to the DEIR

The Draft EIR evaluated the environmental impacts that could be expected to occur from construction of a cardroom facility at four alternative sites in the Town. Comments on the DEIR are included in two sections of this document. Written comments from public agencies and public hearing comments are included and are responded to in Section II. Written comments from the general public are included and are responded to in Section III. Each comment is keyed by number on the original letter; responses to all numbered comments are found on the pages immediately following the letter.

Approval or disapproval of the project will occur at a public hearing before the Town of Colma City Council. If the Town approves a specific project site, the mitigation measures identified in the EIR may be required as conditions of approval.

## I. Introduction

The DEIR was circulated for public and agency review for 45 days beginning December 2, 1993. The public review period for the DEIR closed January 17, 1994.
